	LSOE/LPSOEs				
		LPSOE	\$66,576	\$66,576	\$ -

Fiscal Year salaries in SIO have been converted to Academic Year for comparison purposes, using the standard conversion factor of .86 and rounding to the nearest 100.

Definitions:

Mean: Also called the average, is calculated by adding a group of numbers and then dividing the count of those numbers. For example, the average of 2, 3, 3, 5, 7, and 10 is 30 divided by 6, which is 5.

Median: The middle number of a group of numbers; that is, half the numbers have values that are greater than the median, and half the numbers have values that are less than the median. For example, the median of 2, 3, 3, 5, 7 and 10 is 4.

Standard Deviation: An index of the spread of salary values around the mean value. Usually about two-thirds of the salaries will fall within one standard deviation of the mean salary. For example, if the mean is \$50,000 and the standard deviation is \$5,000, then about two-thirds of the salaries will fall between \$45,000 and \$55,000. If all salaries are the same, the standard deviation is zero.

Definitions:

Mean: Also called the average, is calculated by adding a group of numbers and then dividing the count of those numbers. For example, the average of 2, 3, 3, 5, 7, and 10 is 30 divided by 6, which is 5.

Median: The middle number of a group of numbers; that is, half the numbers have values that are greater than the median, and half the numbers have values that are less than the median. For example, the median of 2, 3, 3, 5, 7 and 10 is 4.

Standard Deviation: An index of the spread of salary values around the mean value. Usually about two-thirds of the salaries will fall within one standard deviation of the mean salary. For example, if the mean is \$50,000 and the standard deviation is \$5,000, then about two-thirds of the salaries will fall between \$45,000 and \$55,000. If all salaries are the same, the standard deviation is zero.

UNIVERSITY OF CALIFORNIA, SAN DIEGO

October 2013 Salary Distribution by Rank for SIO Ladder-Rank and Lecturer-Security of Employment Faculty

Includes all steps within ranks

Division	Department	Series	Rank	Mean	Median	Std Deviation
Scripps Institution of Oceanography						
		LRF Professors				
			Assistant	\$78,160	\$77,200	\$7,706
			Associate	\$84,667	\$86,250	\$6,418
			Full	\$147,326	\$150,350	\$31,443
		LSOE/LPSOEs				
			LPSOE	\$66,576	\$66,576	\$ -
Climate/Atmospheric Sci/Physical Oceanography						
		LRF Professors				
			Full	\$233,300	\$233,300	\$ -
Geosciences Research Division						
		LRF Professors				
			Assistant	\$71,300	\$71,300	\$ -
			Full	\$159,150	\$159,100	\$2,333
Institute of Geophysics & Planetary Physics						
		LRF Professors				
			Full	\$202,300	\$202,300	\$18,385
Integrative Oceanography Division						
		LRF Professors
