Donna Mulcahy is a Principal Analyst in Staff Education and Development, where she has worked 11 years. Donna is a graduate of UC San Diego’s Muir College, and she became a full-time staff member right after graduation.

Donna left the University to pursue a career that would include travel, and while working in the computer hardware and software industries, she traveled to 24 states and 10 foreign countries. She has been a bookkeeper, purchasing agent, computer programmer/analyst, database analyst and sales representative, but no matter what her job title, she was always the person helping to train fellow staff members and customers.

Today, Donna’s primary responsibility is in the area of web-based training development, particularly for UCSD’s financial systems, but she is happy to represent Staff Education and Development whenever the opportunity arises.
