<td><strong>Department:</strong></td>
<td><strong>Written Communication</strong></td>
<td>Written communication is taught, practiced, improved and evaluated in EYSYS103, which requires weekly writing reflections and a substantive research paper. Written communication is taught, practiced, improved and evaluated in EYSYS190B, through completion of a substantive research paper that reports on the students’ senior project outcomes. Many upper division electives effectively develop written communication skills.</td>
<td>Written Communication</td>
<td>Written Communication</td>
</tr>
<tr>
<td><strong>Major:</strong></td>
<td>Effective communicate in written form with particular emphasis on writing that accurately applies principles and concepts in the natural sciences, math and social sciences to contemporary environmental problems.</td>
<td>The EYSYS103 instructors and teaching assistants read and evaluate written assignments and research papers. The EYSYS190B instructor and the EYSYS faculty director read and evaluate all senior project reports. The EYSYS program collects and reviews all student feedback on all EYSYS courses. The EYSYS program regularly reviews CAPE evaluations on courses in other departments that serve as electives in the EYSYS majors. The EYSYS program collects an exit survey of all majors just before graduation that asks about courses and the overall preparation of the major. This material is reviewed by the faculty director and program staff.</td>
<td>Course instructors use student feedback to regularly modify and improve their courses. The EYSYS faculty steering committee regularly reviews major requirements and makes suggestions to improve the curriculum.</td>

**Department:** Environmental Systems

**Major:** Environmental Systems/Earth Sciences
Environmental Systems/Ecology, Behavior and Evolution
Environmental Systems/Enviornmental Chemistry
Environmental Systems/Environmental Policy

(1) Have formal learning outcomes been developed? Yes

(6) Date of the last Academic Senate Review? [i.e. 2015-16 if the review takes place this academic year]
### 2013-2014

**Quantitative Reasoning:**
Apply understanding of the fundamentals of natural sciences and math to the description and quantification of the interactions of the atmosphere, hydrosphere, lithosphere, and biosphere, including humans.

Plan and execute experiments that demonstrate the use and understanding of field techniques, modern instruments, accurate quantitative measurements, appropriate recording skills, safe lab and field practices, and appropriate use of computer and statistical applications. Demonstrate interpretative skills including the ability to analyze data statistically, assess reliability, interpret results and draw reasonable conclusions.

**Quantitative Reasoning**
Met by completion of the required math courses, ESYS core courses, ESYS101, ESYS102 and ESYS103, and other upper division required courses and electives.

**Quantitative Reasoning**
Instructors and teaching assistant grade exams, assignments and moderate classroom discussions.

**Quantitative Reasoning**
The ESYS program collects and reviews student feedback on ESYS core courses and other elective courses.

The ESYS program collects an exit survey of all majors just before graduation. This material is reviewed by the faculty director and program staff.

**Quantitative Reasoning**
Course instructors use student feedback to regularly modify and improve their courses.

---

**Information Literacy**
Locate, understand and evaluate published literature on topics related to environmental science, policy, and related humanities.

Demonstrate the ability to create an appropriately annotated bibliography.

**Information Literacy**
Outcomes 6 and 7 are taught and developed through the research paper requirement for ESYS103 and in the final senior paper that is developed in ESYS190B.

**Information Literacy**
The course instructors review and grade the bibliographies produced in ESYS103 and ESYS190B.

The ESYS program collects and reviews all student feedback in these courses.

**Information Literacy**
Course instructors use student feedback to regularly modify and improve their courses.

---

**Critical Thinking**
Demonstrate capacity to investigate, diagnose and propose solutions to environmental problems in complex interdisciplinary, multi-stakeholder milieus.

Use critical thinking skills to create practical solutions to environmental issues.

Have a sense of community responsibility and develop awareness of scientific issues in the larger social context.

**Critical Thinking**
Critical thinking is emphasized in most of the upper division required courses and electives.

Student fully develop critically thinking skills in proposing a senior internship/project that addresses a complex interdisciplinary issue.

Broader awareness of environmental issues is developed through the internship and/or research requirement in ESYS190A.

**Critical Thinking**
A faculty mentor and the ESYS program director oversee all of the ESYS senior projects.

The ESYS seniors submit a contract, a signed progress report and a final evaluation of their internship/projects. These also include feedback and signatures from their internship supervisor, faculty mentor and the ESYS faculty director.

The ESYS program connects to alumni and other environmental professionals to assess the success of our graduates.

**Critical Thinking**
The ESYS program regularly modifies internship listings and project suggestions based on feedback from students, faculty and alumni and environmental professionals.

---

All other items not color coded
Define and explain the basic principles and concepts of chemistry, physics, biology, calculus, statistics, economics and political sciences.

**All other items not color coded**
This outcome is met through successful completion of lower division prerequisites, including a year of math, physics, chemistry, BILD3 and required courses in economics (ECON1 and ECON131) and political science (POLI160AA)

**All other items not color coded**
The ESYS program regularly reviews CAPE evaluations on courses in other departments that regularly serve as requirements for the major.

**All other items not color coded**
The ESYS faculty steering committee regularly reviews and makes suggestions on major requirements.
