There was significant concern within AFT regarding, what appeared to them, to be UCSD’s practice of contract avoidance. In order to reach an understanding of departmental practices at UCSD we have agreed to a “side letter” to the contract agreement. To that end, the campus will form a working group to meet and discuss departmental decisions to not reappoint NSF faculty in six designated departments—though data will be collected campus-wide. The working group will consist of representatives from UCOP, UCSD, and UC-AFT.

In preparation for working group meetings the side letter has identified time frames for submission of material including a UCSD provided list of all NSF in each of the identified departments that had a pre-six year lecturer appointment. This list will also designate who was not re-appointed for the applicable review year and the reason for the non-reappointment(s).

Implementation of the side letter will require substantial process development and staff training and each Division has been asked to select participants to be a part of the implementation work group. Once mechanisms for data collecting are in place, APS and Labor Relations will host several training sessions targeted specifically for implementation of the campus side letter.
